SUMMARY

I possess a strong computer science background and a creative problem-solving mindset, enabling me to develop innovative solutions. I am dedicated to ongoing learning and staying updated with industry trends and best practices.

SKILLS

Front End : Html5/css3 , JavaScript (ES6) , Reactjs , React Native , Redux Tool Kit , Bootstrap

Back End: Express, Nodejs

Database : Mongoddb, Mysql, Oracle

Programming languages: C/C++ , Python, Java , JavaScript , TypeScript

Project Management: Git, Github, Bitbucket, Trello

EXPERIENCE

React Native Developer

Dev Junction

May 2023 – Present, Islamabad

I contributed to a React Native project at Dev Junction, collaborating with a skilled team to deliver innovative mobile app solutions.

PROJECTS

Kwk-Chat(Maps, Push Notifications, RTK , Flatlist, RefreshControl, Modal)

Dev Junction • June 2023 – July 2023

Responsible for integrating the backend and implementing various features. My contributions included developing interactive maps, creating a seamless Flatlist for post-display, user search functionality, and integrating nearby user features onto the maps.

Personality Assessment Through Social Media(PATSM)

Fast Nuces • February 2022 – February 2023

Utilized Natural Language Processing and Deep Learning models to analyze Twitter data and classify personality traits based on the OCEAN personality traits assessment. Frontend was built with Flutter to ensure a seamless and user-friendly experience, while the backend was powered by Firebase for real-time data management and communication.

Malook Enterprises (MERN)

August 2022 – January 2023

A full-stack web application utilizing Mongoddb, NodeJS, ExpressJS, reactJS and Redux libraries for a ecommerce website that has different use cases like handling product, and filter product basis on price and category.

Learning Management System(MEAN)

November 2022 – December 2022

A full-stack web app utilizing Mongoddb, Nodejs, Express and Angular framework to create LMS in which students have specific profile with an option to enroll in course, assessments and deadlines, quizzes.

Meeting Room Booking System(PHP/html5/css3/xampp)

August 2022 – September 2022

Relational database(xampp) with PHP and HTML/CSS front end. The application handles most use cases of meeting rooms e.g Admin roles for CRUD operations. Staff roles are used only to book rooms for students.
